Ayushi

Profile

Hi! I'm Ayushi, a Computer Science student who loves creating visually appealing and functional websites. I'm currently exploring the world of web development with HTML, CSS, and JavaScript, and building projects that help me learn by doing. I'm passionate about turning simple ideas into interactive digital experiences and constantly working to grow as a creative developer.

Education

B.E.CSE

- 🏛 Chitkara University, Punjab
- 📅 2024 - 2028

Projects

To-Do List Manager

A minimalist task management web app that allows users to efficiently track and organize daily tasks.
Tech Stack: HTML, CSS, JavaScript
Created a responsive, clean UI for adding, completing, and deleting tasks. Integrated localStorage to persist tasks across browser sessions.
Focused on writing modular JavaScript logic for interaction.

Ghost-Mode - Minga London Clone (E-commerce Website)

A fully responsive e-commerce website inspired by Minga London, showcasing fashion items like clothing, bags, jewelry, and accessories.
Tech Stack: HTML, CSS, JavaScript
Designed multiple product sections with stylish layouts, product cards, and CTA buttons.
Developed an engaging user interface with hover effects and responsive design .
Focused on aesthetic design, visual branding, and frontend usability to emulate a real-world brand.

Smart Campus

A campus management system designed to make college life smoother and smart.
Tech Stack: React.js, CSS, MySQL, Node.js
It integrates features like smart attendance tracking, classroom automation, real-time notifications, AI-based doubt solving, and centralized academic management into one platform.
The goal is to reduce manual work, improve communication between students and faculty, and create a more efficient, tech-driven campus environment.

Achievements

Byte Brawl

1st place in an algorithmic coding competition focused on speed and accuracy organised by GeekForGeeks in college campus.
