Aliza

Profile

I'm a computer science student who is passionate about solving problems using code. I have a background of winning coding competitions and collaborating on projects that materialize ideas. I enjoy working with people and learning quickly. I'm hands-on with embedded systems and software and always seek to provide useful, practical solutions. I remain open to challenges and continue to enhance my skills. I'm confident in multitasking and communicating effectively in a team.

Education

B.E

📍 Chitkara University, Rajpura

📅 2024 - 2028

Projects

Ghost-Mode

[Project Link](#)

Ghost Mode is a modern accessories shopping page . It features a clean design with navigation, filters, and a responsive product grid — perfect for showcasing fashion products.

Features

- Header with navigation: New In, Shop, Collections, Sale
- Centered category tab section
- Dropdown filters: Product Type, Size, Colour
- 4-column responsive product grid with 24 items
- Stylish, modern design using HTML, CSS, and JavaScript

Voting Page for bigg boss

[Project Link](#)

This project is a simple **online voting platform** built using HTML, CSS, and C. It allows users to **register, log in, cast votes**, and enables administrators to manage and monitor the voting process. The system is intended for **educational or small-scale elections** such as college events or community polls.

Features

- **Homepage** – Welcoming entry point to the system
- **Login & Registration** – Secure user authentication
- **Voting Page** – Allows registered users to cast a vote
- **Admin Panel** – For managing candidates and viewing results
- **Custom Styling** – CSS-based responsive UI
- **C Backend Logic** – For handling vote counting & data operations

Achievements

Byte Brawl

Geek for Geeks (Problem-Solving Coding Event) secured 1st position in Byte Brawl, a competitive coding contest organized by GeeksforGeeks during the 1st semester at Chitkara University.

Technovision 4.0

DICE Technovision 4.0(DECA Project Competition) Our team's project, "Voice Automated Smart Wheelchair", won 1st prize at DICE Technovision 4.0, competing against all 2nd semester student projects across the university.
